VA Medical Images and Reports

VA Medical Images and Reports is a My Health*e*Vet feature that allows Veterans with a Premium account to securely access their medical images and the associated study reports from their VA Electronic Health Record (EHR).

Four Benefits of VA Medical Images and Reports

1 Allows Veterans to securely access their medical images online and view, print, and download a copy of the associated report.

2 Veterans can now provide a copy of their medical images to other health care providers, including non-VA community providers or providers across VA settings of care.

3 Gives Veterans the opportunity to download and save a copy of their diagnostic quality medical images (DICOM).

4 Offers Veterans the choice of an alternative online option instead of the manual option of physically going to a VA facility to obtain a VA Medical Image or Report.

Radiology Images Currently Available Through the VA Medical Images and Reports Feature:

- Mammograms (screening and diagnostic)
- Radiographs (chest X rays, abdominal X rays, bone X rays)
- Digital radiography (DR), Computed radiography (CR)
- Fluoroscopy (barium swallow, upper GI, barium enema)
- Ultrasounds
- CT scans images and nuclear medicine images (may include Magnetic resonance (MR) in facilities with PET/MR)

- MRI, MR angiography, MR Venography
- Angiography radiographs and cine loops
- Interventional Radiology as part of the procedure (may include radiographs, ultrasound, CT, or cine loop)

  Note: Ultrasounds and Nuclear Medicine may have color images.
